EDUCATION

Loyola Marymount University (LMU)

Bachelor of Science, Information Systems and Business Analytics, minor in Computer Science — Expected May 2027

- Coursework: Network Cloud Computing, Systems Analysis Design, Computer Systems Organization, Data Structures and Applications, Database Management Systems, Developing Business Applications using SQL, Computer Programming, Computer Graphics, Analytics in Supply Chain Management

Universal American School, Dubai

International Baccalaureate Diploma — May 2023

PROFESSIONAL EXPERIENCE

Incoming Data Analytics Engineer Intern at DecisionNext

San Francisco, CA — Expected June 2026 – August 2026

- Will be designing and implementing **ETL architecture**, migrating existing pipelines into a **three-layer data model** with shared components, replayable transformations, and documented data lineage.
- Expected to assist in executing an **ETL migration strategy**, including **validation tooling, parallel runs, and rollback support.**
- Will contribute to customer facing ETL pipelines by supporting **ingestion, transformation, validation, and issue resolution.**

Business Analyst Intern at Scorpio USA LLC

Greenwich, CT — June 2025 – August 2025

- **Delivered LNG bunkering vessel investment pitch,** leveraging maritime datasets and **scenario-based financial models** to support strategic capital allocation**; presented recommendations to 30+ stakeholders.**
- **Built a predictive risk model using Prophet** to forecast vessel incidents; authored a high-visibility report, improving operational risk assessments.
- **Performed on-site fieldwork aboard STI Modest,** observing vessel operations and leveraging firsthand data to strengthen model outputs.
- Attended Marine Money Week and visiting the NYSE, engaging with professionals across maritime finance and energy markets.

Student Research Assistant for Digital Veterans Legacy Project

Los Angeles, CA — January 2025 – Present

- Leading research on biographical information for Veterans Interred at Los Angeles National Cemetery.
- Curating biographies that are uploaded to Veterans Legacy Memorial Website.

Presented research at **LMU's Undergraduate Research Symposium**, showcasing findings to the broader research community.

Product Development Intern at GeoServe Energy Transport DMCC

Dubai, U.A.E — June 2024 – July 2024

- Completed the "Building a Database Agent" course on DeepLearning.AI, enhancing **data sorting and analysis** capabilities.
- Leveraged PowerBI for **validating UAT data** within operations dashboards and performed **detailed KPI analysis** for bunker sales.
- Trained chat bots using Intercom, including custom question paths and data integration for boosted user interaction.
- Conducted **SEO analysis** for Geoserve's verticals and competitors to improve online visibility.

Finance Intern at Focal Shipping Services LLC

Dubai, U.A.E — July 2022 – September 2022

- Assisted in creating and finalizing **income statements, P&L, and Balance Sheets.**
- Improved the online **digital filing management system** and shadowed business development team in meetings with clients.

SKILLS

- **Technical:** Microsoft Excel, Access, PowerBI, Python, Prophet, pandas, SQL, Java, JSON, Snowflake, Streamlit, dbt, Docker, Github Actions
- **Languages:** Fluent in English, Hindi, Spanish, and Arabic
- **Leadership Experience:** Treasurer for National Honor Society and Founder of "Let's Talk About It".

PROJECTS

L'Oréal Consumer Intelligence Dashboard – Lancôme Whitespace Analysis · https://github.com/djain2905/loreal-consumer-intelligence

- Built an end-to-end **Consumer & Market Insights (CMI) pipeline** – Kaggle API → Snowflake → dbt star schema (10 models, 56 tests) → deployed Streamlit dashboard – to identify product whitespace opportunities for Lancôme from 600K+ verified Sephora reviews.
- Detected and classified **desire language** across 5,951 Lancôme reviews into 9 consumer need themes using **SQL and regex**; surfaced Sensitive Skin Formula as the top whitespace and delivered an actionable recommendation projecting ~4,500 first-year customers and ~$518K Year 1 revenue.
- **Automated weekly data pipelines via GitHub Actions** and built a Claude Code-queryable brand knowledge base from 19 scraped sources across Lancôme.com, L'Oréal.com, WWD, Sephora, and Wikipedia - synthesizing competitive and strategic context to make quantitative signals interpretable.

ETL Refactor Project – LNG Operations Analytics · https://github.com/djain2905/LNG-ETL

- Built an ETL pipeline using **pandas to extract raw LNG datasets**, clean and transform data, and load structured tables into a SQL database.
- Added data validation checks to improve data quality and **modularized ETL scripts** to support re-running transformations with updated data.

LMU Datathon – 1st Place Winner

- Competed against **150+ participants from 18+ universities.**
- Analyzed the **impact of meal break regulations on EMT operations** using Python, SQL, and Excel; presented findings to 10+ industry judges, winning 1st place overall.

CERTIFICATIONS

Microsoft Office Specialist: Excel Associate (Office 2019)
